

GABRIELLA FABRI

in association with
Harrow Green

*Head of asset and facilities management
Central and Eastern Europe, EC Harris*

GABRIELLA FABRI IS DEEPLY INVOLVED IN AN INTERESTING FACET OF THE FM INDUSTRY: the trend towards globalisation. She is the recently appointed head of asset and facilities management for EC Harris in Central and Eastern Europe.

This image was snapped on a recent visit to the built asset consultancy's London office, during one of its regular workshops, where ideas are shared among colleagues working in various countries and markets.

Fabri's new role will see her take responsibility for the strategic development of asset and FM services across the region at EC Harris, centred on Hungary as the FM hub.

She has a wealth of experience working in FM, managing Hungarian and EU-wide portfolios of large-scale properties, developments and funds. Prior to joining EC Harris, Fabri was the Hungarian country manager at Engel East Europe.

The role is already proving 'challenging and fascinating'. Fabri says: 'It is interesting to see how different and common the issues are in FM across the different countries. And, of course, to see where a common approach is effective' **fm**
